How we're launching Linguini

Saturday 17 October, 3:01pm in Singapore. Our Product Hunt listing, every post we'll publish, the banners, who we're telling and the checklist, with the reasons behind each call.

● Draft plan · nothing posted yet · checked 24 September 2026

We're putting Linguini on Product Hunt on **Saturday 17 October at 3:01pm Singapore time**. This page is the whole plan: the listing, **every post we'll publish**, the banners, who we're telling and the checklist we're working through. Take whatever's useful.

When we launch

One Product Hunt day, 00:01 to 23:59 Pacific, is 3:01pm Saturday to 2:59pm Sunday in Singapore. The hours when most of the US is awake land in our night, so we split into shifts.

Product Hunt's day starts at 12:01am Pacific, which is 3:01pm for us. That's a gift. We go live in the afternoon, wide awake, and get ten hours of posting and replying before a night shift takes over.

We picked a Saturday. Weekdays bring more visitors, but a Tuesday also has about three times as many launches as a Saturday, and Product Hunt's own guide says weekend launches get 15% more clicks through to the product. We're a small student team with a small network. Clicks to the demo are what we want, and a quieter day gets us more of them.

One more check: the US leaves daylight saving on 1 November, which would push our start to 4:01pm. 17 October is before that.

Open doors or an invite list?

An invite list is tempting. Clubhouse was invite-only for 16 months and Arc for over a year, and both made people want in. But they had products people were already talking about. We don't yet.

- **The browser demo is open to everyone**, no sign-up. It works today, end to end.
- **The learner app goes to 10 to 20 beta testers first**. Photo upload still returns sample words instead of reading your picture. We'd rather a small group finds that than a front page of strangers.

The listing

Hi Product Hunt! We're the team behind Linguini. We kept noticing that the words we wanted to learn were already in front of us: the café table, the view on a walk, the things on our desk. So we built a language app around those moments.

Today you can try a full mini session on our site in Spanish or French. Pick a scene, explore its words, play I-Spy and sentence games, and watch it become a journal page. The learner app is still in beta, so the mini session is the clearest way to see the idea today.

We'd love specific feedback: which part helped a word stick, and what would bring you back tomorrow? Tell us which scene you picked and where you got stuck. We're in the comments all day.

The tagline says what you can do in the demo today. Our full-release line, "Learn Spanish or French from the photos you take", waits until the app reads your own photos. The first comment ends on two questions because people answer questions. Product Hunt says 70% of its Product of the Day, Week and Month winners had one from the maker.

The logo for Linguini, featuring the word "Linguini" in a stylized, rounded, orange font. The letters are thick and friendly, with a wavy underline beneath the "i"s.

The world is your lesson.

Try a mini session

linguini-landing.vercel.app

The 50-second explainer for the listing. It ships with captions because most people watch with the sound off.

What we'll post

These are the real drafts. Tap around: the likes, the carousel and the tabs all work.

● X · LAUNCH-DAY THREAD

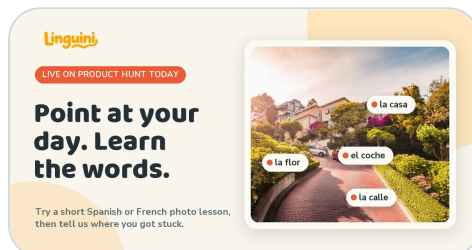

Linguini Draft · 17 Oct

Linguini is live on Product Hunt today 🍷

Pick a photo of a street, a café or a desk. Linguini pins the Spanish or French words onto it, you play a round of I-Spy with them, and the lesson ends as a page in your journal.

It's early. Tell us where you got stuck 📌

Linguini Draft · 17 Oct

Why photos? A word sticks when it belongs to a place you remember. A flashcard has no place. Your camera roll is full of them.

Linguini Draft · 17 Oct

Built by a small student team at NUS. Spanish and French for now, free to try in your browser, nothing to install.

The listing, with the 50-second explainer: [\[PH_POST_URL\]](#)

● INSTAGRAM · 4:5 CAROUSEL

linguini Original audio

Linguini

Today's lesson is on your camera roll.

Spanish · French

Product Hunt · 17 Oct

linguini Today's lesson is on your camera roll 📷

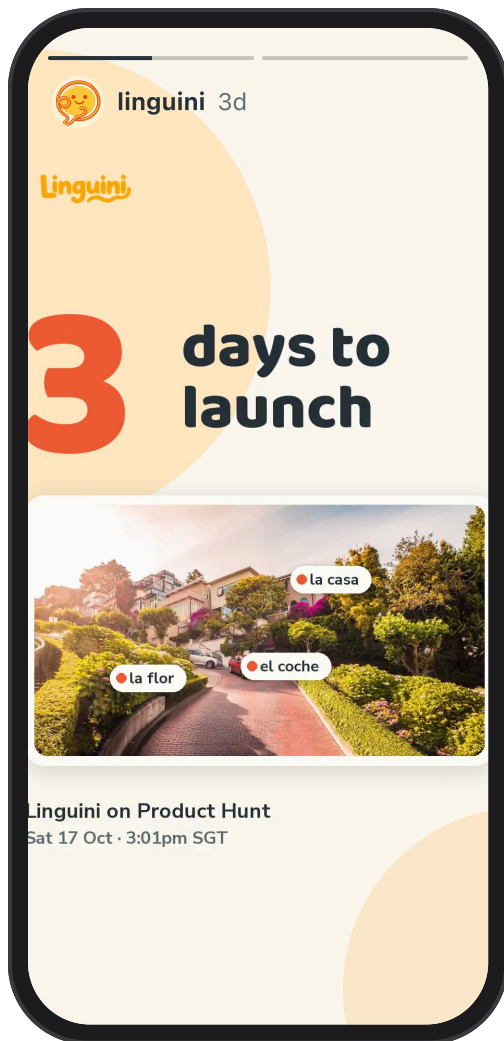

Linguini is live on Product Hunt. Pick a photo, learn the words inside it in Spanish or French, play a round of I-Spy and keep the day as a journal page.

Link in bio. What's the first thing you'd photograph?

[#learns spanish](#) [#learn french](#)
[#language learning](#) [#studygram](#)
[#product hunt](#)

X gets a thread: the first post carries the link card, the replies carry the why. Instagram is 4:5 because it takes the most room in the feed, and a carousel gives anyone who scrolls

past a second slide to stop on.

Stories

A countdown at T-3, then “we’re live” on the day with a link sticker. The story banner leaves the top and bottom clear, because that’s where Instagram puts its own buttons.

Draft ·

We put Linguini on
Product Hunt today.

It started as a CS3216
project with a simple bet:
vocabulary lists are easy
to forget, but the places
you walk through every
day are not. So Linguini
starts with a photo, pins
Spanish or French words
onto it, and ends each
lesson as a journal page.

The browser demo is
open to everyone. The full
app is with a small group
of beta testers while we
finish real photo analysis.

If you teach, learn or build
things, I'd value one
honest comment on the
listing: which step would
make you come back
tomorrow?

Your photo is the lesson.

Snap a photo of a street, a view, Linguini turns it into a
short Spanish or French lesson and a journal page.

Available on Product Hunt Oct 27 Oct 30 (3 days)

Weekly self-
promotion thread

**We made a photo-
based Spanish mini
lesson. Does the
photo actually help
you remember?**

Small student team here.
The idea: learn words
from a place you
recognise (a street, a
café), then use them in I-
Spy and a short sentence
before saving it as a
journal page. There's a
free demo with sample
scenes, no sign-up. We're
trying to work out if the
photo helps recall or
just looks nice. If you try
one scene, what would
you change?

15:12 ✓✓

LinkedIn is written by one of us, not the brand, because people reply to people. Reddit gets a question, not an announcement. The Telegram message is lowercase because that's how we actually text each other. None of them ask for upvotes. Product Hunt can pull a launch for that, and a comment tells us more anyway.

Banners

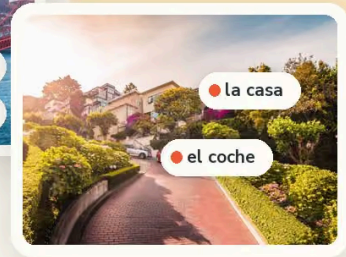

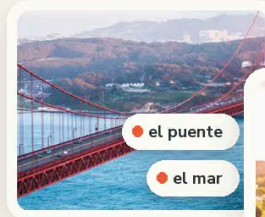

Seven files, one look: a real demo photo with the words pinned on, the same way the app shows them. One script draws them all, so moving the date is a one-line change.

Learn the language of your day.

Spanish and French from everyday photos.

On Product Hunt Sat 17 Oct · 3:01pm SGT

X header 1500 × 500

Profile header from T-7. Text sits top-left because the avatar covers the bottom-left.

Your photo is the lesson.

Snap a café, a street, a view. Linguini turns it into a short Spanish or French lesson and a journal page.

Launching on Product Hunt Sat 17 Oct · 3:01pm SGT

LinkedIn cover 1584 × 396

Our personal profiles and the page. Copy starts right of the logo.

LIVE ON PRODUCT HUNT TODAY

Point at your day. Learn the words.

Try a short Spanish or French photo lesson, then tell us where you got stuck.

Who we're telling, closest first

We go out in circles. Friends, classmates and beta testers hear first, one message each, because they'll try it properly and tell us the truth. Communities come next, once we've fixed what that first circle found. Creators get a personal note with no ask to post.

Communities

r/SideProject

Self-promotion allowed.

r/languagelearning 3.4M

Promotion only in the resources thread, or with mod permission.

We lead with how we built it, since that's what the sub is for.

The biggest room of exactly our learners. One post, in the right thread.

r/Spanish

Weekly self-promotion thread; we message the mods first.

Spanish is our strongest demo, so this is where feedback will be sharpest.

Discord: Refold Central, Language Learning Community, Language Cafe

~28k to 37k each

Promo channels only.

People here practise daily. They'll tell us if it helps or just looks nice.

Indie Hackers

One Show IH post, framed as a request for feedback.

Other makers give the most useful notes on the listing itself.

NUS Hackers Friday Hacks

They're looking for speakers until 13 Nov.

Ten minutes of live demo in a room beats any post.

Creators

Lindie Botes ~357k on YouTube

Reviews language apps, is a UX designer and worked in Singapore. Our first email.

Xiaomanyc ~7.1M on YouTube

Speaks to strangers in their language. The closest fit to speak-first, and a long shot.

Matt vs Japan (Refold) YouTube

Comprehensible input. A photo of your own street is input you already understand.

Ten smaller tutors and study accounts

under 50k

Picked by audience, not follower count. More likely to try it and reply.

Where we're not posting, and why

- **r/French.** No advertising at all. We'll join as learners instead.
- **HelloTalk.** Its guidelines ban promotion.
- **Steve Kaufmann and Ikenna.** They run LingQ and Fluyo. Asking a competitor to feature us is awkward for everyone.
- **Show HN.** Not yet. HN will upload their own photo in the first minute and get sample words back. We post once real photo analysis ships.
- **AI newsletters (The Rundown, TLDR AI, Ben's Bites).** Same reason. Pitching an AI tool while the AI part is sample data would backfire.

Launch day, hour by hour

All times Singapore, Saturday into Sunday.

14:00 Last check

Fresh sign-up on a phone, every button on the landing page, dashboards open.

15:01 Live

Listing goes live on schedule. First comment up. We check the gallery and the link ourselves.

15:10 Tell our people

One-to-one messages to friends and testers who asked to hear. X thread, Instagram post and story, LinkedIn.

16:00 Reply to everything

Every comment gets an answer within the hour. Post in the self-promo spaces we've cleared: r/SideProject, the r/Spanish weekly thread, Discord promo channels.

21:00 US wakes up

9am Saturday on the US east coast. Second Instagram story, reply to the new wave.

01:00 Night rota

Handover to one responder and one engineer on call. Everyone else sleeps.

08:00 Sunday morning

Check errors, sign-ups and demo completions. Second nudge in our NUS class chats for anyone who missed it.

14:59 Day ends

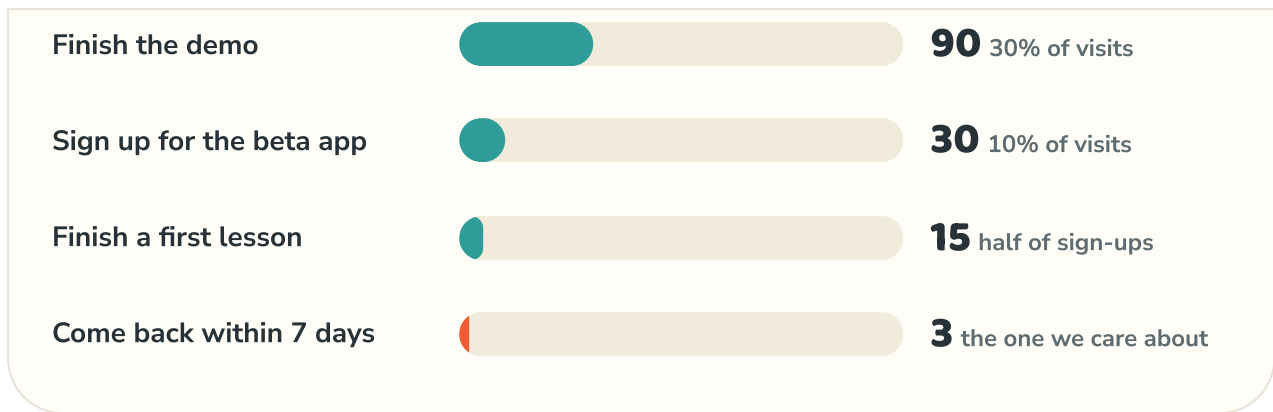

Screenshot the numbers, thank everyone who commented, write down what broke.

After launch day

Upvotes are over by Sunday. What we're actually watching is whether someone does a second lesson within a week.

Visit from launch links

300 tagged by source

Our targets for the first 14 days, not forecasts. We'll publish the real numbers either way.

For scale: Amplitude puts an app in the top quarter if 7% of new users are back on day 7.

Duolingo, after years of streak tuning, sees 42% of its monthly learners on any given day (58.7 million of 140.6 million in Q2 2026). We're not Duolingo. We just want to know if our loop brings anyone back.

What we're doing about it:

- **No account for the first lesson.** The demo is the onboarding.
- **Every lesson ends with picking tomorrow's scene**, so there's a reason to open it again.
- **One reminder on day two**, only if you opted in, using your own photo. Not a daily blast.
- **A streak from day one**, and a weekly recap of your journal: the week's photos and words on one page.
- **The next launch is already planned:** real photo analysis. Product Hunt allows a relaunch after a big update, and we want to arrive with our week-one numbers.

On the day itself, someone is always watching the error dashboard. If sign-up breaks, we stop posting, put a note on the landing page and send people to the demo while we fix it.

Our checklist

We copied the shape of Yangshun Tay's launch dashboard for Docusaurus 2.0, which won Product of the Day: links, a timed run, checkboxes, then channel lists. Ours is in the repo as `launch/checklist.md`. This copy ticks, and remembers your progress in this browser.

0 of 28 done

Three weeks out by 26 Sep

- | | |
|--|---------|
| ☐ Agree the promise: browser demo open to everyone, learner app in beta | Product |
| ☐ Point every landing-page button at the production app, then tap each one on a phone | Eng |
| ☐ Make every landing claim match the app today: photo analysis, speech, Plus trial | Product |
| ☐ Track demo started, demo finished, sign-up, first lesson, second lesson | Eng |

Two weeks out by 3 Oct

- ☐ Recruit 10 to 20 beta testers learning Spanish or French Beta
- ☐ Watch five of them use it cold. Fix whatever confused two or more Beta
- ☐ Draft the listing on a personal Product Hunt account and add every maker PH
- ☐ Upload the explainer to YouTube as unlisted, with captions Marketing

One week out by 10 Oct

- ☐ Swap in the X header and LinkedIn cover Marketing
- ☐ Reread the rules of every community on our list; message the r/Spanish mods Outreach
- ☐ Personal note to Lindie Botes and ten smaller language creators, with no ask to post Outreach
- ☐ Ask NUS Hackers for a Friday Hacks demo slot Outreach
- ☐ Schedule the listing for Sat 17 Oct, 00:01 Pacific PH

Three days out Wed 14 Oct

- ☐ Countdown post and story Marketing
- ☐ Tell friends and testers the date, and ask who wants a message on the day Outreach
- ☐ Write the duty rota: afternoon, night and morning shifts in Singapore time Incident

Day before Fri 16 Oct

- ☐ Go or no-go: buttons work, a stranger can sign up, analytics arrive, inbox staffed, someone can roll back Product
- ☐ Freeze the copy and the assets. No edits after this Marketing

Launch day Sat 17 Oct, 3:01pm SGT

- ☐ First comment up within a minute of going live PH
- ☐ X thread, Instagram post and story, LinkedIn out by 3:10pm Marketing
- ☐ Every Product Hunt comment answered within the hour Community
- ☐ Hourly check of errors, sign-ups and demo completions Eng

After D+1 to D+14

- ☐ Swap [PH_POST_URL] into every post, and add the Product Hunt badge to the landing page Eng
- ☐ D+1: fix the onboarding bugs people hit on the day Eng
- ☐ D+3: talk to five people who came back and five who didn't Product
- ☐ D+7: look at who did a second lesson; fix the biggest drop-off Product
- ☐ D+14: publish what we learned, with the real numbers Marketing
- ☐ Put the next launch on the calendar: real photo analysis Product

The launch kit

Everything above, in one place. Banners are further up, each with a save button.

Product Hunt gallery, 1 to 4
1270 × 760, in order
